NOTICIAS

NUEVA REVISTA DE OSTEOLÓGÍA JOURNAL OF MUSCULO SKELETAL AND NEURONAL INTERACTIONS

La Sociedad Internacional de Interacciones Musculo-esqueléticas y Neuronales, constituida por un grupo multidisciplinario dedicado a la fisiología y enfermedades del hueso con su participación muscular, bioquímica, vascular y neurológica, acaba de iniciar su andadura con el primer número, excelentemente editado, y que contiene diferentes partes al uso.

Dirigida por G.P. Lyritis, contiene trabajos de conocidos profesionales interesados en estos problemas como los doctores Frost y Jee. Hay varios trabajos originales así como revisiones de conjunto y resúmenes de mesas redondas; todo ello dando una visión integral de la fisiología y patología ósea que complementa otras revistas de este progresivo amplio campo de la patología humana.

Para información complementaria escribir a Mrs. Susan Clarkson. E-mail: jsmni@ismni.org.
