ALEH Multicentric Study

ARTICLE INFO

Article history:

Received 7 August 2020

Accepted 10 August 2020

The COVID-ALEH Registry coordinated by the Viral Hepatitis Group of Interest is open and enrolling patients. This registry aims to evaluate the impact of liver injury in patients hospitalized with COVID. The study has been registered at *ClinicalTrials.gov* NCT04358380. Overall, 122 investigators from 77 health institutions distributed in 12 Latin American countries participate in the

study. Thus far, more than 1600 patients were enrolled. This is the first time ALEH coordinates an observational study of this magnitude. The registry is still active. For those who are willing to join this project, please contact: info@alehlatam.org [https:// alehlatam.org/investigacion-y-educacion/ grupos- de- interes/ hepatitis-virales/](https://alehlatam.org/investigacion-y-educacion/grupos-de-interes/hepatitis-virales/)
