RUBINSTEIN-TAYBI SYNDROME: A FEMALE PATIENT WITH A DE NOVO RECIPROCAL TRANSLOCATION T(2;16)(Q36.3; P13.3) AND DYSGRANULOPOIESIS

CASE DESCRIPTION

Correction: The karyotype had a clerical error. The correct karyotype is 46,XX,t(2;16)(p11.2, p13.3), thus, the patient presents one translocation between the short arms of chromosomes 2 and 16.
