II WORLD CONGRESS ON CHILDREN AND YOUTH HEALTH BEHAVIORS

Presentation

Dear Colleague,

It is our pleasure to have held the II World Congress on Children and Youth Health Behaviors, in April 08th-10th, 2015 at the Federal University of Roraima, Boa Vista, capital of the state of Roraima, Brazil.

The Federal University of Roraima-UFRR, created by Decree 98127 of September 08th 1989, was the first public institution of higher education in the state. Since the beginning, UFRR has trodden the determination to build a critical mass, with specialized staff of professionals able to contribute to regional development, in particular, and also the Amazon region as a whole.

Over the past years, UFRR has been expanding its commitment to the society in Roraima, seeking not only the excellence in undergraduate teaching, but also expanding significantly its contribution through the development of Post-Graduate Research and Extension. Among the actions for Researching and Graduate Studies, established by the proper institutional development plan, highlight the strength and expansion towards national and international institution exchanges, through scientific technical cooperation agreements.

The II World Congress on Children and Youth Health Behaviors program offers a multidisciplinary scientific quality, which provided a comprehensive review of the most important theoretical and practical contexts in health education, and recent achievements in this field of research.

Under the theme “Education and Health: challenges in search of life quality”, we are called to contribute to the debate on demands and indicators of health and global education, reaching the diversity of various ethnicities.

The challenge of this II World Congress was therefore include conferences, symposium, workshops and free communications, which allowed to prepare an event with active and determined participants in order to share with the international community, all the best scientific expertise. Thus, we will develop a series of activities that allows participants to interact with colleagues from different countries.

Finally, we thank the health professionals, educators, teachers, academics and researchers who participated in the exchange of knowledge and experience to contribute to the relevance of research in education and health area internationally.

Thank you!
